

## WFV-1RU | WFV-2RU | WFV-3RU | WFV-4RU

The Racktech vertical wall frame provides a versatile storage solution for equipment including network devices, power distribution rails and patch panels to be mounted vertically, flush with the wall.

The vertical wall frame saves space and is suitable for environments where there is a lack of area for a full size rack.

The frame can be installed in a shallow communication cupboard or horizontally under a desk to enable easy access to equipment directly from the workspace.

Other suitable applications include the home office, under a stairwell, hallway or in a corridor.

### Features

- › Suitable for hanging vertical equipment and patching
- › Frames supplied only, mounting fasteners not included
- › Supplied in a flat pack with assembly required
- › Colour is black

### Technical Specifications
