

WR Series – QLD-EQ Range

The WR Series wall mounted cabinets are built to the highest standards with flexibility and ease of installation at the forefront of the design criteria.

The welded frame provides a stable structure while the key lockable quick release door provides security and opens to 180° degrees.

Removable side panels with locks and cable knockouts in the top and bottom panels enables easy access during wiring and fitout.

Double section wall cabinets come with a rear section with reversible lift off hinges, providing flexibility and easy access, enabling one person to install the cabinet.
